Technical Skills

- **Languages:** Python, SQL, HTML
- **Frameworks and Libraries:** FastAPI, Flask, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Hugging Face Transformers, Ollama, Chroma DB, CrewAI, Langchain, LangGraph, NLTK
- **Tools:** PowerBI, VS Code, Jupyter Notebook, MySQL Workbench

Experience

Inew Technologies - AI Developer

Feb - May 2026

- Partnered with a 4-member engineering team via GitHub to architect automated data ingestion pipelines, leveraging advanced OCR and LLM segmentation, parameter extraction techniques to successfully parse highly complex manufacturing documents.
- Acquired deep expertise in GenAI (RAG, LLMs), agentic frameworks (LangChain, LangGraph), and vector databases. Built end-to-end process automation workflows, including a custom History Manager for systematic task logging and JSON state execution tracking.
- Acquired knowledge on advanced prompt engineering to orchestrate targeted LLM interactions, transforming highly unstructured OCR data into standardized JSON schemas. Translated this foundational AI expertise into an automated reasoning engine that independently cross-references batch data against master rules, completely streamlining enterprise workflows via dynamic PDF compliance reports.

Projects

Iverix

April 2026

Python — Ollama — Flask — Reportlab — ChromaDB — LangChain — Gemini 2.5 Flash

- Implemented a ChromaDB vector database powered by gemini-embedding-001 to index dynamically extracted master BMR chunks, enabling highly accurate retrieval for compliance checks across 100+ page documents and achieving a 95% increase in processing speed.
- Architected a high-precision RAG system featuring a Dual KB (ChromaDB) within a single collection, seamlessly bridging permanent static rules with dynamically changing batch data. Optimized retrieval accuracy using LangChain's recursive text splitter, cosine similarity matching, and a custom history manager for strict context tracking
- Built a multi-model auditing engine driven by structured Gemini prompts that improves compliance accuracy by 90% by minimizing hallucinations during parameter analysis against master chunk data. By automatically generating comprehensive PDF reports with specific compliance and non-compliance reasoning, the pipeline achieved an 85

ReddInsight-Ollama

Jan 2026

Python — Ollama — Streamlit — Pandas — Reddit API (PRAW) — SQL — Plotly — Multithreading

- Designed and developed a privacy-focused Reddit brand monitoring system using Python, Streamlit, and the Reddit API (PRAW) to track brand mentions across multiple subreddits with all AI inference performed locally via Ollama.
- Implemented local LLM-based NLP analysis using Ollama to classify Reddit mentions by sentiment, topic, and urgency, and optimized the inference pipeline using multithreading with 4 worker threads, achieving a 80% reduction in overall analysis latency for batch Reddit mention processing.
- Engineered a robust analytics backend with SQLite and Pandas to support duplicate-safe data ingestion, structured storage, interactive visualizations (Plotly), and AI-generated summaries that translate raw Reddit conversations into actionable insights

Niyam Drishti

Oct – Dec 2025

Python — FastAPI — Crawl4AI — docTR (OCR) — Google Gemini 2.0 — MongoDB

- Architected a scalable web scraping pipeline using Crawl4AI and FastAPI to aggregate product packaging data from major e-commerce platforms (Amazon, Flipkart, Blinkit) for automated Legal Metrology compliance auditing.

- Designed and implemented a compliance workflow to process scraped product metadata and OCR-extracted packaging information for automated regulatory validation.
- Built an AI-powered compliance validation pipeline using Google Gemini 2.0 Flash to detect missing mandatory attributes such as LMPC details and Country of Origin, generate structured compliance reports, and improve compliance detection accuracy by 88%.

Education

Ajeenkya DY Patil School Of Engineering

July 2023 – July 2027

BE in Computer Engineering

- **TE SGPA:** 9.14
- **Coursework:** Data Science and big data Analytics, Web Technology, Artificial Intelligence, Information Security

Manikgarh Cement English School

- **HSC:** 77.2% (JULY 2022)
- **SSC:** 79.3% (JULY 2020)

Achievements

- **1st Rank in Project Based Learning Exhibition:** Handsign Translator
- **Published Research Paper:** “Hand Sign Translator: Bridging the Communication Gap for ISL Users” [🔗](#) (ICAT-CICT)
- **Barak 6:** “Runner-up at Smart India Hackathon (SIH)” [🔗](#)
